

REACH-Regulation

Sapa Extrusion Nenzing GmbH herewith confirms that we have pre-registered all alloying elements of our blank, anodized and powder coated aluminium profiles according to

REACH 1907/2006 (1st June 2007)

within the period prescribed.

In addition we confirm that no substances of the so-called candidate list of alarming materials (173 SVHC materials), from 12.01.2017, are present in our aluminium profiles to a larger extent than 0,1 %.

As a matter of course we are in regular contact with all our suppliers to verify upfront a potential relation with REACH.

In case of any further questions we are at your disposal.

Nenzing, January 2017

Dr. Gerold Trommelschläger
Managing Director
